The State, regional biologist met at the Springs on 11/19 to discuss the deer population in the Springs. According to the biologist the deer in our community are overpopulated and have eaten all their natural food in our woods. The only solution offered is to thin the deer population by hunting. They will complete their evaluation of the Springs and give us their estimate of how many deer need to be removed. What action to take will have to be evaluated by the board before the 2010 hunting season.

The next board meeting will be 12/18 at 5:30 PM.
