Keep your house fire-safe by cleaning up

Fall Leaf Litter

Three places to clear:

Rooftops & Gutters

Clean all leaves, needles, and debris from your roof & rain gutters.

Beneath Decks & Porches

Keep these areas free of flammable material. Consider enclosing with metal screens or non-combustible skirting.

At least 5-30 feet from around your house

Keep the area around your house raked free of fallen leaves and needles, creating a buffer zone between your house and potential flammables.
